I.II Network License

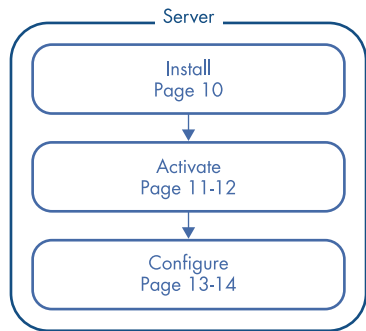

Network License means the clients get their licenses from a network server that is authorized with a ZWCAD Network License. A Network License is ideal for medium to large organizations with many users. Admin can manage licenses by allowing, limiting or reserving license seats for specific users or groups.

A Network License Manager (NLM) should be installed on the server and both the server and the client need to be configured to enable licensing.

Please refer to the flowchart below.

I.II Network License

I.II.I Install Network License

STEP 1

Choose 32 bit or 64 bit version that fits your operation system.

STEP 2

Check **Network License Manager**, then click [Install].

STEP 3

Click [Finish] when completed.

I.II.II Activate Network License

STEP 1

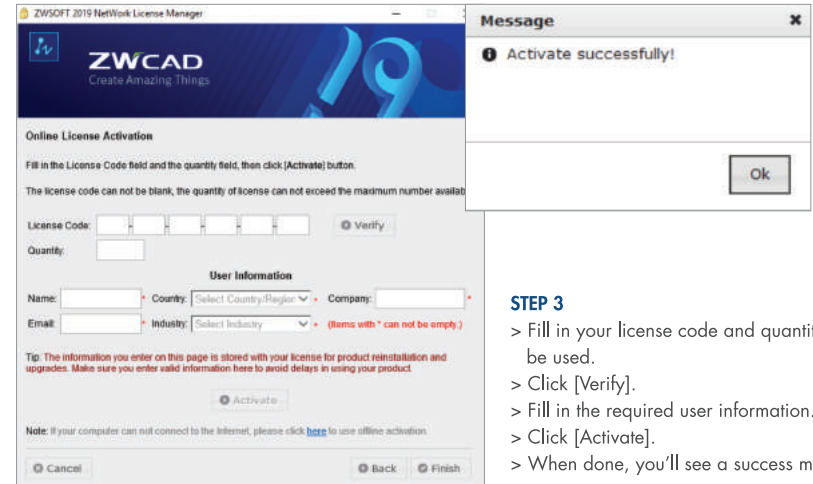

Launch the **Network License Manager** from Windows Start Menu.

STEP 2

Click [Activate].

I.II.II Activate Network License

STEP 3

- > Fill in your license code and quantity to be used.
- > Click [Verify].
- > Fill in the required user information.
- > Click [Activate].
- > When done, you'll see a success message.

The activation should be processed within Internet access. If the Internet access is limited, please follow the Note at the bottom to go with Offline Activation.

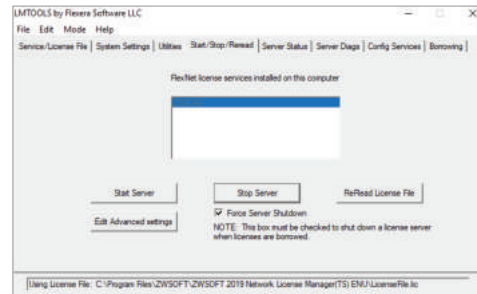

STEP 1
Launch the **Network License Configuration** from Windows Start Menu.

STEP 2
> Go to the tab **Config Services**.
> Click [Save Service].

STEP 3
> Go to the tab **Service/License File**.
> Choose **Configuration using Services**.
> Select the service name.
> Check the option.
LMTTOOLS ignores license file path environment variables.

STEP 4
> Go to the tab **Start/Stop/Reread**.
> Click [Start Server].

STEP 5
> Go to the tab **Server Status**.
> Click [Perform Status Enquiry].
> Check the text box below to confirm the status.
> You will see the total amount of licenses that have been issued.

I.II.IV Floating and Borrowed License

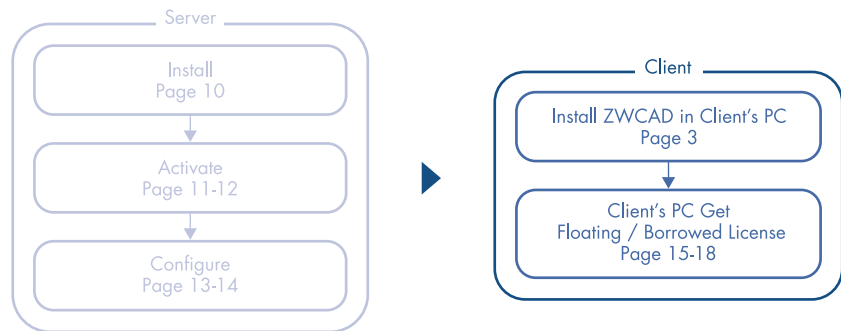

There are 2 ways to obtain license from server, which are Floating and Borrowed. You can choose one of them to activate the ZWCAD on the client side.

Floating:

The client side can obtain a license from the server automatically when they start ZWCAD. The server dynamically allocates a network license, reclaims the license when the product is inactive and re-allocates it. Network connection between clients and server is always required, which is suitable for in-house working.

Borrowed:

The client side can obtain a license from the server manually and store it locally for a specified period of time (maximum 180 days), so that it can still have the authorization when disconnected from the server, which is suitable for outdoor working.

I.II.IV Floating and Borrowed License

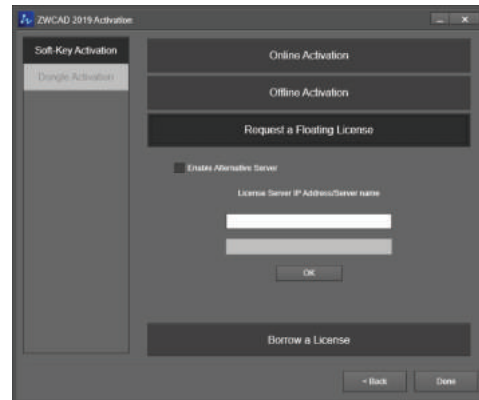

STEP 1

Install ZWCAD according to the installation instruction from Page 3.

STEP 2

Launch the license manager according to the instruction from Page 5 and choose **Soft-Key Activation**.

STEP 3

- > Choose **Request a Floating License**.
- > Fill in the IP address or server name.
- > Click [OK].

I.II.IV Floating and Borrowed License

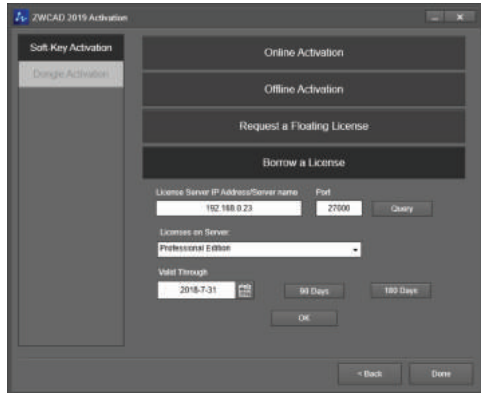

STEP 1

Install ZWCAD according to the installation instruction from Page 3.

STEP 2

Launch the license manager according to the instruction from Page 5 and choose **Soft-Key Activation**.

STEP 3

- > Choose **Borrow a License**.
- > Fill in the IP address or server name.
- > Click [Query] and choose the version you need from the drop-down list below.

I.II.IV Floating and Borrowed License

STEP 4

- > Specify the validity period you want to use ZWCAD on your computer (maximum 180 days).
- > Click [OK].

Do not change the default Port value 27000, unless it has been specified.

How to Transfer Your License

If you plan to install your current ZWCAD onto another computer or have to do it because of a software or hardware change, e.g. replacing or reformatting a system hard drive, you need to transfer your license(s).

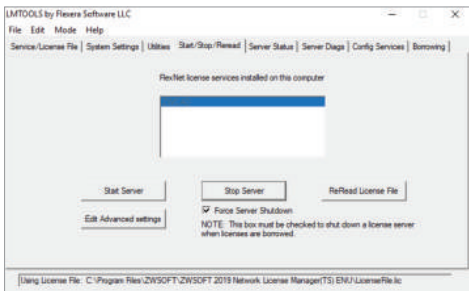

To transfer, you can deactivate your current license on client side, or on server, then activate it again on any new computer.

II. Deactivation – Network License Manager

STEP 1
Launch the **Network License Configuration** from Windows Start Menu.

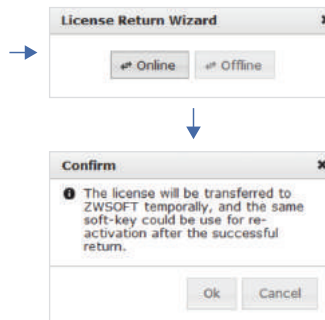

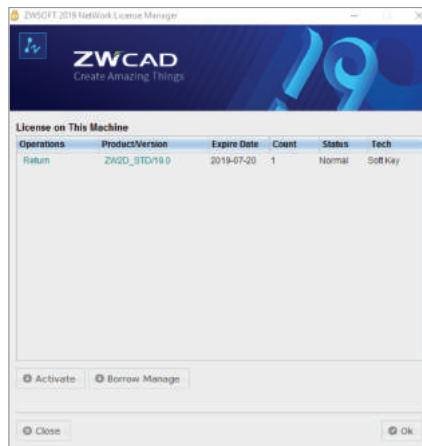

STEP 2
> Go to the tab **Start/Stop/Reread**.
> Check **Force Server Shutdown**.
> Click [Stop Server].

STEP 3
Launch the **Network License Manager** from Windows Start Menu.

II. Deactivation – Network License Manager

STEP 4
> Click [Return], then click [Online].
> Click [OK] to proceed.

STEP 5
You'll see a success message when done.

The deactivation should be processed with Internet access. If the Internet access is limited, please choose the Offline way then follow the guide to deactivate.
